Blue Polypro Mooring Lines 8-Braid

Poly-Dan Blue Mooring Rope

Introducing our new improved mooring lines. Poly Danline Blue Mooring Rope is manufactured from high tenacity polypropylene yarns. It offers better breaking strength compared to standard poly monofilament 8-strand rope in being used for mooring, anchoring lines.

Specification of Poly Dan Blue Mooring Line

*** Standard Coil Length: 720 Ft w/6 Ft Polyester Webbing Covered Eye Each End**

♦ Material ***** Polypropylene ♦ Melting Point ***** 165°C ♦ Specific Gravity ***** 0.91 (float) ♦ Elongation at break * 20~22% ♦ Water Absorption *** None Characteristics *High strength compare to standard Poly Monofilament rope ♦ ♦ *Float, doesn't absorb water *Easy handling *Good abrasion resistance *Color: Blue Applications *Ship Mooring Lines, Towing Lines, Anchor Lines ♦ ♦ ♦ ♦	Diameter		Circumference		Weight	Breaking Strength
